Doc-it — Complete Test Checklist

QA Manual Testing

2026-03-09

1. SETUP & FIRST RUN

- ☐ Open `/setup` — initial admin creation page loads
- ☐ Create admin account with username, password, email
- ☐ Redirected to login page after setup
- ☐ Setup page no longer accessible after admin is created

2. AUTHENTICATION

Login

- ☐ Login with valid credentials — redirected to main app
- ☐ Login with wrong password — error shown
- ☐ Login with non-existent user — error shown
- ☐ Session persists after page refresh
- ☐ Session expires after 8 hours (or idle timeout at 1 hour)
- ☐ Logout — redirected to login page
- ☐ Cannot access main app without login

Registration

- ☐ Open `/register` — registration form loads
- ☐ Register new user
- ☐ New user sees "Access Pending" screen (no spaces assigned)
- ☐ Admin contacts shown on pending screen

TOTP MFA

- ☐ Enable TOTP from profile — QR code shown
- ☐ Scan QR code with authenticator app
- ☐ Verify TOTP code to complete setup
- ☐ Backup codes are shown and downloadable
- ☐ Login now requires TOTP code
- ☐ Login with backup code works
- ☐ Disable TOTP from profile
- ☐ Admin force-enable TOTP for a user

Password & Security

- ☐ Change password from profile page
- ☐ Old password rejected after change
- ☐ Password reuse prevented (history check)
- ☐ Account lockout after repeated failures
- ☐ Legacy SHA-256 hash auto-migrated to bcrypt on login

3. USER PROFILE

- ☐ View profile page (`/profile`)
- ☐ Update full name
- ☐ Update email
- ☐ Upload avatar image
- ☐ Avatar displays in topbar
- ☐ Change accent colour — UI updates immediately
- ☐ Change editor font size (Small / Normal / Large / X-Large)
- ☐ Toggle "Always show Table of Contents" preference
- ☐ Preferences persist across sessions / devices

4. ADMIN PANEL

User Management

- ☐ Open admin panel (`/admin`)
- ☐ View list of all users
- ☐ Edit user details
- ☐ Delete a user
- ☐ Promote user to admin
- ☐ Revoke admin status
- ☐ Reset user's TOTP

Space Management

- ☐ Create a new space
- ☐ Edit space name/slug
- ☐ Delete a space
- ☐ Assign user to space with role (admin/writer/reader)
- ☐ Change user's role in a space
- ☐ Remove user from a space

SMTP Settings

- ☐ Configure SMTP server (host, port, user, password)
- ☐ Send test email
- ☐ Save SMTP settings

Service API Keys

- ☐ Create a service API key (`dk_s_...`)
- ☐ Set per-space permissions on service key
- ☐ Set expiry date
- ☐ Secret shown once on creation
- ☐ Delete a service key

Backup & Restore

- ☐ Configure backup settings (schedule, retention)
- ☐ Add local backup target
- ☐ Add CIFS/SMB backup target
- ☐ Run manual backup
- ☐ Backup file appears (`.tar.gz.enc`)
- ☐ Download a backup
- ☐ Restore from a backup
- ☐ Retention cleanup removes old backups
- ☐ Key rotation — rotate encryption key

- ☐ After rotation, TOTP/backup/CIFS passwords still work

5. SPACES & NAVIGATION

- ☐ Switch between spaces via topbar dropdown
- ☐ Space home page displays on space switch
- ☐ Only accessible spaces shown for non-admin users
- ☐ Space home shows recent activity / overview

6. SIDEBAR

Categories

- ☐ Create a new category
- ☐ Create a nested sub-category
- ☐ Rename a category
- ☐ Delete an empty category
- ☐ Cannot delete category with documents
- ☐ Expand / collapse category tree
- ☐ Set category icon (emoji picker)
- ☐ Set category colour

Documents List

- ☐ Documents listed under their categories
- ☐ Click to open a document
- ☐ Active document highlighted
- ☐ Right-click context menu (rename, move, delete, etc.)
- ☐ Document status indicator shown (draft/review/approved)

Tags

- ☐ Tags section starts collapsed
- ☐ Expand tags section
- ☐ Tags tree shows hierarchical `parent/child` structure
- ☐ Click tag — filters documents
- ☐ Tag shows document count
- ☐ Expand tag shows associated documents
- ☐ Click document under tag — opens it
- ☐ “Collapse all” / “Expand all” buttons work
- ☐ Reindex tags button works

Favorites

- ☐ Add a document to favorites
- ☐ Add a database to favorites
- ☐ Favorites section shows in sidebar
- ☐ Click favorite — navigates to document/database
- ☐ Remove a favorite
- ☐ Favorites persist across sessions

Templates

- ☐ Templates section visible in sidebar
- ☐ Create a new template
- ☐ Edit an existing template
- ☐ Export a template

- ☐ Import a template

7. DOCUMENT BAR

- ☐ Breadcrumb shows `category / docname.md`
- ☐ Page width toggle (Narrow / Wide / Max) works
- ☐ Revision badge shown (e.g., "Rev 3")
- ☐ Click revision badge — opens history modal
- ☐ Tag chips displayed for tagged documents
- ☐ Remove tag via × button on chip
- ☐ Add tag via + button
- ☐ Tag autocomplete from existing tags
- ☐ Create new tag inline
- ☐ Document classification badge shown (Public/Internal/Confidential/Restricted)
- ☐ Click classification — dropdown to change
- ☐ Like/thumbs up button works
- ☐ Like count updates
- ☐ Reading view toggle (BookOpen icon)
- ☐ Presence avatars shown when others are editing

8. EDITOR — TEXT FORMATTING

- ☐ Enter edit mode (pencil button)
- ☐ Type text — text appears
- ☐ Select text — bubble menu toolbar appears
- ☐ **Bold** (Cmd+B)
- ☐ *Italic* (Cmd+I)
- ☐ Underline (Cmd+U)
- ☐ ~~Strikethrough~~
- ☐ Highlight text (multiple colours available)
- ☐ Text colour picker
- ☐ Font size change
- ☐ Superscript
- ☐ Subscript
- ☐ Inline code
- ☐ Clear formatting
- ☐ Undo (Cmd+Z)
- ☐ Redo (Cmd+Shift+Z)

9. EDITOR — SLASH COMMANDS

Headings

- ☐ Type `/` — slash command menu appears
- ☐ `/Heading 1` — inserts H1
- ☐ `/Heading 2` — inserts H2
- ☐ `/Heading 3` — inserts H3
- ☐ `/Heading 4` — inserts H4
- ☐ Filter slash commands by typing (e.g., `/head`)

Lists

- ☐ `/Bullet List` — creates bulleted list
- ☐ `/Numbered List` — creates numbered list
- ☐ `/Task List` — creates task list with checkboxes
- ☐ Indent list items (Tab)

- ☐ Outdent list items (Shift+Tab)
- ☐ Task list — check/uncheck items

Alignment

- ☐ `/Align Left`
- ☐ `/Align Center`
- ☐ `/Align Right`

Content Blocks

- ☐ `/Callout` — inserts callout block (info style)
- ☐ Change callout type (info/warning/success/danger)
- ☐ `/Code Block` — inserts code block
- ☐ Code block language selector
- ☐ Code block syntax highlighting
- ☐ Code block copy button
- ☐ `/Collapsible` — inserts collapsible section
- ☐ Collapse / expand collapsible section
- ☐ `/Divider` — inserts horizontal rule
- ☐ `/Quote` — inserts blockquote

Table

- ☐ `/Table` — inserts 3×3 table with header row
- ☐ Type in table cells
- ☐ Navigate cells with Tab
- ☐ Header row styled differently
- ☐ Add row below
- ☐ Add row above
- ☐ Delete row
- ☐ Add column right
- ☐ Add column left
- ☐ Delete column
- ☐ Delete entire table
- ☐ Merge cells
- ☐ Split merged cells
- ☐ Table header toggle

Media & Inserts

- ☐ `/Image` — opens file picker, inserts image
- ☐ Resize image (drag handles)
- ☐ `/Attachment` — opens file picker, uploads file
- ☐ Attachment download link rendered
- ☐ `/Drawing` — opens Excalidraw editor
- ☐ Draw in Excalidraw, save — drawing embedded
- ☐ Edit existing drawing — reopens Excalidraw
- ☐ `/Diagram` — inserts Draw.io iframe
- ☐ Edit diagram in Draw.io, SVG preview renders
- ☐ `/PDF` — uploads and embeds a PDF viewer
- ☐ PDF pages render and are scrollable
- ☐ `/Link` — inserts hyperlink
- ☐ Edit link URL and text
- ☐ `/Inline Equation` — inserts KaTeX math
- ☐ Math equation renders correctly
- ☐ `/Emoji` — opens emoji picker
- ☐ Selected emoji inserted

- ☐ `/Color Swatch` — opens colour picker
- ☐ Colour swatch inserted with hex code
- ☐ `/Date Now` — inserts current date & time
- ☐ `/Date Today` — inserts today's date

Data / Docs

- ☐ `/New Database` — creates and inserts new database
- ☐ `/Insert Database` — inserts existing database
- ☐ `/Linked Document` — links to another doc in space
- ☐ Linked doc click navigates to target
- ☐ `/Template Field` — inserts template placeholder

Other Editor Features

- ☐ Drag handle — drag blocks to reorder
- ☐ `#tag` inline — creates tag link
- ☐ Click inline tag — navigates to tagged doc or selects tag
- ☐ `@mention` — mentions a user
- ☐ Emoji shortcodes (`:smile:`) convert to emoji

10. EDITOR — AUTOSAVE & MODES

- ☐ Autosave triggers while editing (status shows "Saving…" then "Autosave on")
- ☐ Exit edit mode — changes persisted
- ☐ Edit mode — pencil icon changes to checkmark
- ☐ View mode — markdown rendered as HTML
- ☐ Reading view — clean reading layout
- ☐ Distraction-free mode — all chrome hidden
- ☐ Exit distraction-free mode with Esc

11. TABLE OF CONTENTS

- ☐ TOC panel shows H1–H4 headings
- ☐ Click TOC entry — scrolls to heading
- ☐ TOC updates when headings change
- ☐ Resize TOC panel
- ☐ Close/open TOC via tab toggle on page edge
- ☐ "Always show TOC" preference remembered

12. DOCUMENT OPERATIONS

Revision History

- ☐ Open history modal (click rev badge or menu)
- ☐ List of revisions shown with timestamps
- ☐ View a specific revision
- ☐ Diff/compare view between revisions
- ☐ Restore a previous revision
- ☐ Revision number increments after edit

Archive

- ☐ Archive a document (right-click or menu)
- ☐ Document disappears from sidebar
- ☐ Open archive modal — archived doc listed
- ☐ Restore archived document — reappears in sidebar

Trash

- ☐ Delete a document — moved to trash
- ☐ Open trash modal — deleted doc listed
- ☐ Restore from trash
- ☐ Permanently delete from trash

Move

- ☐ Move document to another category
- ☐ Document appears in new category
- ☐ Removed from old category

Rename

- ☐ Rename document via context menu
- ☐ New name reflected in sidebar and breadcrumb

Share

- ☐ Share document — generates share link
- ☐ Set share mode (read / read-write)
- ☐ Set share password
- ☐ Set share expiry
- ☐ Copy share link
- ☐ Open share link in incognito — doc accessible
- ☐ Expired share link blocked

13. DOCUMENT STATUS & REVIEW

- ☐ Set document status (Draft / In Review / Approved / Published)
- ☐ Submit document for review
- ☐ Reviewer receives notification
- ☐ Reviewer can approve or request changes
- ☐ Status badge updates in sidebar

14. DATABASES

- ☐ Create a new database from sidebar
- ☐ Database opens in main content area
- ☐ Add columns with types: text, number, date, checkbox, select, multi-select, URL
- ☐ Add rows
- ☐ Edit cell values
- ☐ Delete a row
- ☐ Delete a column
- ☐ Rename a column
- ☐ Switch to Table view
- ☐ Switch to Board (Kanban) view
- ☐ Switch to Gallery view
- ☐ Filter rows by column value
- ☐ Sort by any column (asc/desc)
- ☐ Search within database
- ☐ Rename database
- ☐ Delete database
- ☐ Add database to favorites
- ☐ Embedded database in document renders correctly

15. GLOBAL SEARCH (Cmd+K)

- ☐ `Cmd+K` opens search modal
- ☐ Type query — instant results (name + tag matches)
- ☐ Server-side content search with snippets
- ☐ Changelog results shown
- ☐ Asset results shown
- ☐ Helpdesk ticket results shown
- ☐ Click result — navigates to document/item
- ☐ Recent searches remembered
- ☐ Clear recent searches
- ☐ Filter: by category
- ☐ Filter: by tag
- ☐ Filter: by author
- ☐ Filter: by classification
- ☐ Filter: by date range (from / to)
- ☐ Keyboard navigation (arrows + Enter)
- ☐ Escape closes modal
- ☐ Topbar search field triggers search modal

16. JOURNAL

Personal Journal

- ☐ Open journal page (`/journal`)
- ☐ Create new journal entry
- ☐ Set entry date
- ☐ Set entry title
- ☐ Write entry content (markdown)
- ☐ Add tags to entry
- ☐ Set mood emoji
- ☐ Save entry
- ☐ Edit existing entry
- ☐ Delete entry
- ☐ Pin / unpin entry
- ☐ Calendar view — days with entries highlighted
- ☐ Click calendar day — shows entries for that day
- ☐ Filter by tag
- ☐ Filter by date range
- ☐ Search entries by text
- ☐ Show only pinned entries
- ☐ Entries are encrypted at rest (verify via DB)
- ☐ Export journal as JSON

Space Journal

- ☐ Switch to space journal
- ☐ Create space journal entry
- ☐ Space journal entries visible to space members

Journal Templates

- ☐ Create journal template
- ☐ Use template when creating entry
- ☐ Delete template

17. CHANGE LOG

- ☐ Open changelog page (`/changelog`)
- ☐ Create new changelog entry
- ☐ Auto-assigned ID (CHG-0001, etc.)
- ☐ Set date
- ☐ Set system name (with autocomplete from previous entries)
- ☐ Set category (Disk/Network/Security/Software/Hardware/Configuration/Other)
- ☐ Set risk level (Low/Medium/High/Critical)
- ☐ Set status (Completed/Failed/Rolled Back)
- ☐ Write description
- ☐ Write impact assessment
- ☐ Link to a documentation page (optional)
- ☐ View entry details
- ☐ Filter by date range
- ☐ Filter by category
- ☐ Filter by system name
- ☐ Search by free text
- ☐ Risk level colour coding visible

18. ASSET MANAGEMENT

- ☐ Open assets page (`/assets`)
- ☐ Create a container group (e.g., "Rack A")
- ☐ Create nested sub-group
- ☐ Rename a container
- ☐ Delete empty container
- ☐ Create new asset
- ☐ Auto-assigned ID (AST-0001, etc.)
- ☐ Set asset name, type, status
- ☐ Set IP addresses
- ☐ Set OS, location, owner
- ☐ Set purchase date, warranty expiry
- ☐ Add notes
- ☐ Fill custom fields
- ☐ Edit existing asset
- ☐ Delete an asset
- ☐ View asset detail modal
- ☐ Filter by container (click tree node)
- ☐ "All Assets" view shows everything
- ☐ Search across all asset fields
- ☐ Sort by column (name/type/status/location/owner)
- ☐ Custom field definitions — add new field
- ☐ Custom field definitions — edit field
- ☐ Custom field definitions — delete field
- ☐ CSV import — upload CSV file
- ☐ CSV import — map columns
- ☐ CSV import — assets appear after import

19. HELPDESK & TICKETING

Agent UI

- ☐ Open helpdesk page (`/helpdesk`)
- ☐ Create new ticket
- ☐ Set subject, description, priority, category
- ☐ Assign to group

- ☐ Assign to person
- ☐ Link to asset (optional)
- ☐ Fill custom fields
- ☐ View ticket detail panel
- ☐ Add comment (public)
- ☐ Add internal note
- ☐ Upload attachment to comment
- ☐ Download ticket attachment
- ☐ Change ticket status
- ☐ Change ticket priority
- ☐ Close a ticket
- ☐ Reopen a ticket
- ☐ SLA timer display (response due / resolution due)
- ☐ Filter tickets by status
- ☐ Filter tickets by priority
- ☐ Filter tickets by assigned group
- ☐ Search tickets

Admin Configuration (`/helpdesk/admin`)

- ☐ Create support group
- ☐ Add members to group
- ☐ Edit group
- ☐ Delete group
- ☐ Create ticket category
- ☐ Edit category (name, description, icon, order)
- ☐ Delete category
- ☐ Create custom field definition
- ☐ Edit custom field (name, type, required, options)
- ☐ Delete custom field
- ☐ Form Designer — create new form
- ☐ Form Designer — add standard fields (subject, description, priority, category, asset)
- ☐ Form Designer — add custom fields
- ☐ Form Designer — reorder fields (drag & drop)
- ☐ Form Designer — set field width (half/full)
- ☐ Form Designer — set help text
- ☐ Form Designer — set category filter on form
- ☐ Form Designer — set default form
- ☐ Form Designer — delete form
- ☐ Rule Engine — create new rule
- ☐ Rule Engine — add conditions (field, operator, value)
- ☐ Rule Engine — set match type (all/any)
- ☐ Rule Engine — add actions (assign group, set priority, etc.)
- ☐ Rule Engine — enable/disable rule
- ☐ Rule Engine — set stop-on-match
- ☐ Rule Engine — reorder rules
- ☐ Rule Engine — delete rule
- ☐ Rule Engine — verify rule fires on ticket creation
- ☐ SLA Editor — create SLA policy
- ☐ SLA Editor — set response/resolution times per priority
- ☐ SLA Editor — set business hours
- ☐ SLA Editor — set default SLA
- ☐ SLA Editor — delete SLA policy

20. PORTAL & PUBLIC PAGES

Portal User Flow

- ☐ Open portal login page (`/portal/login`)
- ☐ Register portal user (`/portal/register`)
- ☐ Login as portal user
- ☐ Portal home page loads with widgets
- ☐ Submit ticket from portal
- ☐ View "My Tickets" from portal
- ☐ Add comment on own ticket
- ☐ Logout from portal

Portal Page Designer (Admin)

- ☐ Open portal page designer in helpdesk admin
- ☐ Create new portal page
- ☐ Set page name and slug
- ☐ Set page as home page
- ☐ Add Hero widget — configure title, subtitle, colour
- ☐ Add Ticket Form widget
- ☐ Add My Tickets widget
- ☐ Add Announcements widget — configure content
- ☐ Add FAQ widget — configure Q&A pairs
- ☐ Add Categories widget
- ☐ Add Search widget
- ☐ Add Custom HTML widget — enter HTML
- ☐ Add Quick Links widget — configure links
- ☐ Reorder widgets (drag & drop)
- ☐ Set widget width (full / half / third)
- ☐ Remove widget from page
- ☐ Preview page
- ☐ Publish page (Globe icon)
- ☐ Unpublish page (GlobeLock icon)

Public Portal Listing

- ☐ Open `/portals` — published pages listed
- ☐ Click portal card — opens `/portals/[slug]`
- ☐ Unpublished pages not shown in listing
- ☐ Widgets render correctly on public page

21. AUDIT LOGGING

- ☐ Open admin audit tab
- ☐ Calendar heatmap shows event volume
- ☐ Click day — shows events for that day
- ☐ Event explorer lists events
- ☐ Filter by event type
- ☐ Filter by actor
- ☐ Filter by date range
- ☐ Event details expandable
- ☐ Export as CSV
- ☐ Export as JSON
- ☐ Verify integrity (HMAC chain check)
- ☐ Configure retention days
- ☐ Configure syslog target
- ☐ Test syslog connection

- ☐ Audit events logged for: login, logout, doc create, doc edit, user create, space create, settings change (spot-check)

22. THEMING & PERSONALISATION

- ☐ Switch to each theme and verify UI renders:
- ☐ — Light
- ☐ — Solarized Light
- ☐ — Dracula Light
- ☐ — Catppuccin Latte
- ☐ — Paper
- ☐ — High Contrast
- ☐ — Blossom
- ☐ — Lavender
- ☐ — Dark
- ☐ — Dracula
- ☐ — Nord
- ☐ — Solarized Dark
- ☐ — GitHub Dark
- ☐ — Catppuccin Mocha
- ☐ — Twilight
- ☐ — Midnight Rose
- ☐ — High Contrast Dark
- ☐ Switch accent colour (Blue/Indigo/Violet/Rose/Orange/Green/Teal)
- ☐ Accent colour reflected in buttons, links, badges
- ☐ Theme preference saved to profile

23. API KEYS

- ☐ Create personal API key (`dk_u_...`) from profile
- ☐ Secret shown once — copy it
- ☐ Set expiry date
- ☐ Use key as Bearer token in API request — works
- ☐ Expired key rejected
- ☐ Delete personal API key
- ☐ Service key (`dk_s_...`) with space-level permissions — test API access

24. NOTIFICATIONS & PRESENCE

- ☐ Presence avatars shown when multiple users edit same doc
- ☐ Presence warning when another user is editing
- ☐ Watch a document for availability
- ☐ Notification appears when watched doc becomes available
- ☐ Browser notification (if permitted)
- ☐ Dismiss notification
- ☐ Clear all notifications
- ☐ Click notification — navigates to document

25. TOPBAR

- ☐ Space switcher dropdown works
- ☐ Home button returns to space home
- ☐ Search field opens search modal
- ☐ Archive button opens archive modal
- ☐ Trash button opens trash modal
- ☐ Review badge shows pending review count

- ☐ Click review badge — navigates to document under review
- ☐ Notification bell shows notification count
- ☐ User menu — profile, admin, logout links
- ☐ All tooltips display on icon hover

26. RESPONSIVE & EDGE CASES

- ☐ App loads without JavaScript errors (check console)
- ☐ No broken images or missing icons
- ☐ Empty states: no docs, no spaces, no tickets — all show friendly messages
- ☐ Long document names truncated properly
- ☐ Large documents (500+ lines) load without lag
- ☐ Concurrent editing by two users — no data loss
- ☐ Browser back/forward navigation works
- ☐ Page refresh preserves state (selected doc, space)
